## What's New

August 7th 2009

**Sustainable building operations are all about minimizing energy consumption while maximizing comfort. WebCTRL's EnergyReports offers both existing and new customers an incredibly flexible and easy-to-use reporting tool that uses our extensive trending capabilities for metering energy consumption and our Environmental Index for measuring comfort.**

- **Designed around ease of use and the power of simplicity**
- **Incorporates the 'Environmental Index'**
- **Integrates multiple energy sources**
- **Energy can easily be normalized by area or people**
- **Incorporates Cooling and Heating Degree Day data**
- **Scalability – multiple database support**
- **Configurable vertical axis control to easily switch units from kWh to Carbon to BTU's to BTU/Square Foot**
- **Built-in report manager & archive to save your favorite reports**
- **Built-in report scheduler & email**
- **Reports can be generated in standard file formats like Adobe Acrobat & MS Excel**
- **Designed for WebCTRL systems with minimal setup; initial deployment and mobilization costs have been minimized through smart design.**
- **Single source responsibility – customers do not have to worry about integrating a third party 'bolt-on' solution. WebCTRL WebApps install and run on the existing WebCTRL server.**
